Géza,

Congratulations!!! Please express my heartfelt gratitude to Dr. Rita Horvath that I share with you. This is one of the most important and memorable victories in my business career, we as the management team of [REDACTED] Hungary were very fortunate to establish a working relationship with you and Rita early on in this critical project to maintain the correct custom coding of our [REDACTED]. From the heart, I have to tell you and Rita, I have never worked with more committed, dedicated, and knowledgeable professionals than the two of you. Thanks to God that we were smart enough to follow your wisdom and guidance. This was an unbelievable learning experience for all of us, especially those of us who were close enough to the issues to know how close we came to losing this battle on many occasions. Once again, you and Rita guided us through the [REDACTED] to safety to prove that persistence pay dividends when you know what you are doing. You often said that we were lucky, but as an old saying goes, "it seems the harder we work against the odds, the luckier we get". I will always remember with great pride and fond memories the many sessions, we had together around the big grey table in our offices. Although at first there were some differences in our philosophy, you and Rita prevailed on your local knowledge and experience. This also proved to be a team effort with all the participants contributing to the final outcome, but it would not have happened as fortunately if you and Rita had not been at the front leading us. I could not be prouder of what the team has accomplished and I am confident that this pride and gratitude is felt by the entire management team of [REDACTED]. A different result could have had disastrous negative impact for years to come not only in Hungary but in Central Europe countries.

I never doubted you or Rita for one moment, I had complete trust and confidence in both of you which I hope was demonstrated in our working relationship. I sincerely miss working with you.

Thank you for you kind words regarding the unfortunate fateful events in the states. My wife Janette was in the states at the time in Seattle visiting our daughter who had just given birth to our second grandchild, a boy. Everyone is fine and Janette returned to [REDACTED] this weekend, glad to have her back.

Save the beer, when I get to Budapest and we have a chance to get together, we will be drinking champagne in your honor to our success.

Please pass along my best to Rita, if there is ever anything I can do for the two of you, a reference letter or whatever, please do not hesitate to call on me.

With sincerest regards, heartfelt gratitude for your friendship,

Ron
